

Learning Projects- Half Term Year 2

SCIENCE

Activity 1

Grow your own

I wonder what plants need to be able to grow? Find out the important points [here!](#)
Now you know all the key points, why not try to grow your own? Click the link below to find out more!

Activity 2

Tiny Plant World

Fancy making your own small garden that will take care of itself? It's called a 'Terrarium'. Watch the video below to give you ideas on how to make your very own plant world.

Activity 3

Snow Powder

Ever wanted to make your own snow powder? Even though the sun is shining there's always time to make some snow powder! Click the link below to find out how!

Activity 4

Cress Head

Fancy making a cress head? Watch this super simple video and design your own cress head! (*Watch up to 1:13*)
How long can you get their hair?

Activity 5

Overnight crystals

Fancy making your very own overnight crystals? I know we do! Take a look at this video and try making your own crystals over night!
